

SPRING GRAND ARIZONA

MAY 17-27, 2023

© 2022

Southeast Arizona is, without a doubt, one of the richest and most exciting birding areas in the United States. It has a greater variety of nesting landbirds than any other comparable area in the country, many of them Mexican species that only here spill over into the United States. Rising out of the desert floor are a series of spectacular mountain-ranges—the northern extension of the Sierra Madre—which harbor many of

these Arizona specialties. Zone-tailed Hawk, Montezuma Quail, Whiskered Screech-Owl, Spotted Owl, Rivoli's Hummingbird, Blue-throated Mountain-gem, Elegant Trogon, Arizona Woodpecker, Sulphur-bellied and Dusky-capped flycatchers, Virginia's and Black-throated Gray warblers, and Painted Redstarts inhabit the oak/sycamore woodlands of lower canyons. Farther up, amid the firs and pines, Buff-breasted Flycatcher; Mexican Chickadee; Red-faced, Grace's, and Olive warblers; and Yellow-eyed Juncos can be found. Riparian habitat in the vicinity of Patagonia and Nogales is home to such exotics as Gray Hawk, Violet-crowned and Broad-billed hummingbirds, Northern Beardless-Tyrannulet, Vermilion and Brown-crested flycatchers, Thick-billed Kingbird, Lucy's Warbler, and Abert's Towhee. Finally, the beautiful Sonoran desert hosts the tiny Elf Owl, Gila Woodpecker, Gilded Flicker, Bendire's Thrasher, and Rufous-winged Sparrow, to name but a few. In all, up to nine species of owls and eleven species of hummingbirds are possible on this trip!

In addition to its rich variety of regularly occurring species, southeast Arizona is one of the best areas to add an "accidental" to your U.S. list. At least three of these Mexican visitors—the Black-capped Gnatcatcher, Rufous-capped Warbler and the Five-striped Sparrow—have become somewhat regular (albeit with tiny populations) over the past 15 years. Others, such as Eared-Quetzal, Plain-capped Starthroat, Berylline Hummingbird, Tufted and Nutting's flycatchers, Rufous-backed Robin, Aztec Thrush, Crescent-chested and Fan-tailed warblers, and Flame-colored Tanagers remain true

vagrants. While none of these are at all likely on any given tour, the mere chance that one may show up in a particular year only adds to the excitement.

Chiricahua Mountains, Arizona © Barry Zimmer

May 17, Day 1: Arrival in Tucson. Participants may plan to arrive in Tucson (airport code TUS) at any time today and transfer to our hotel where a room will be reserved in your name. We will meet in the hotel lobby at 6:30 p.m. for a get-acquainted dinner. Those who wish to join our optional trip to the Arizona-Sonora Desert Museum, one of the best “living” museums in the world, should arrive in time to depart from the hotel lobby at 1:30 p.m. The Arizona-Sonora Desert Museum, supported entirely by a private foundation, has an excellent collection of native animals and plants of the southwestern deserts. In addition, many wild birds occur on the grounds, such as Gambel’s Quail, Gila Woodpecker, Curve-billed Thrasher, and Verdin. Our visit to the museum will provide perhaps our best shot at finding the localized Costa’s Hummingbird and Black-tailed Gnatcatcher. This should be a good introduction for our tour. We **strongly** encourage everyone to make this option, if possible.

NIGHT: Hampton Inn, Tucson

May 18, Day 2: Green Valley and Madera Canyon. We will likely start out in residential Green Valley, where yards filled with native vegetation harbor a good variety of desert species. Our primary target will be the localized Rufous-winged Sparrow, but other possibilities include Harris’s Hawk (uncommon), Gilded Flicker (scarce & seriously declining), Gila Woodpecker, Brown-crested Flycatcher, Verdin, Black-throated Sparrow, Pyrrhuloxia, and Lucy’s Warbler among others. The remainder of the morning will be devoted to birding several different life zones in Madera Canyon. An early morning search of the mesquite grasslands below the canyon could produce Black-throated and Botteri’s (very uncommon in spring) sparrows. Nearby, the oaks and sycamores of the Proctor Road area may harbor Golden Eagle, Cassin’s Kingbird, Bewick’s and Canyon wrens, Bell’s Vireo, and Lucy’s Warbler. If Varied Buntings have returned from their wintering grounds (often not until mid-May or later), this is an excellent place to locate one.

Late morning will be spent in the upper portion of the canyon (including a visit to the feeders at Santa Rita Lodge). Possibilities include Arizona and Acorn woodpeckers, Broad-billed and Rivoli’s hummingbirds, Dusky-capped

Flycatcher, Bridled Titmouse, Mexican Jay, Hutton's Vireo, Black-throated Gray Warbler, Painted Redstart, and Black-headed Grosbeak.

After lunch, we will try to take a mid-afternoon break to recharge for the evening activities. Late in the afternoon we will head back to Madera Canyon for a picnic dinner and our first owling excursion. Elf Owl, Western and Whiskered screech-owls, Common Poorwill, and Lesser Nighthawk will all be sought.

Whiskered Screech-Owl © Barry Zimmer

NIGHT: Hampton Inn, Tucson

May 19, Day 3: Madera Canyon to Nogales. This morning we will revisit Madera Canyon. Our primary target will be the iconic Elegant Trogon, assuming any have been reported there recently. We will devote some time to searching for this Arizona specialty. Additionally, we will likely head to nearby Box Canyon. A pair of the extremely localized Five-striped Sparrow has been sighted here on and off in recent years. If any are currently present, we will make a special effort to locate them. Other birds we may encounter in this area include Golden Eagle, White-throated Swift, Canyon and Rock wrens and Scott's Oriole.

After lunch, we may bird the De Anza trail in Tubac. Some years, a pair of highly-sought Rose-throated Becards have inhabited this area, though they are not to be counted on. At any rate, birding the riparian habitat along the Santa Cruz River could yield Gray Hawk, Vermilion Flycatcher, Tropical Kingbird, Yellow-breasted Chat and Abert's Towhee. By mid to late afternoon, we will continue south toward Nogales.

NIGHT: Best Western Sonora Inn & Suites, Nogales

Five-striped Sparrow © Barry Zimmer

species). In 2007 the road conditions to reach California Gulch were so poor as to be nearly impassable. It is conceivable that future tours may not be able to get to this location. The past several years however, the road has been in an improved condition. The late afternoon will likely find us watching hummingbirds at the Paton's Hummingbird Center in Patagonia, where Violet-crowned, Broad-billed, Anna's, and Black-chinned are all likely.

NIGHT: Best Western Sonora Inn & Suites, Nogales

May 21, Day 5: Patagonia Lake State Park and Sonoita Creek Sanctuary; Patagonia to Sierra Vista. We will be up early for a full day's exploration of the Sonoita Creek area. This is one of the most famous birding spots in the country and a great variety of species may occur here. Our prime targets will be the regal Gray Hawk and the localized Thick-billed Kingbird. Our search for these specialties will often be interrupted by the likes of other avian gems such as Costa's Hummingbird, Vermilion Flycatcher, Northern Beardless-Tyrannulet, Phainopepla, Lucy's Warbler, and Yellow-breasted Chat. Zone-tailed Hawks are occasionally seen overhead here as well. Other likely species today include White-throated Swift, up to 14 species of flycatchers (including Ash-throated, Brown-crested, and Dusky-capped), Canyon and Rock wrens, and Summer Tanager.

After lunch we will head east toward Sierra Vista, watching for Pronghorns en route. Horned Lark, Grasshopper Sparrow, and Lilian's Meadowlark (just split by the AOS) are all possible in the grasslands along the way. In the afternoon, we'll visit feeders in the Huachuca Mountains, either Ash or Miller Canyon, where we can relax and let the hummingbirds come to us. Broad-tailed, Rivoli's, and Black-chinned appear most regularly; Broad-billed and Anna's are usually present; and sometimes also a Lucifer, Violet-crowned Hummingbird or White-eared (occasional).

NIGHT: Hampton Inn, Sierra Vista

May 22, Day 6: Huachuca Mountains. The entire day will be spent exploring the famed Huachuca Mountains, including a visit to Carr Canyon. Amidst the oak-covered slopes, rocky canyons, and open groves of pines, we will make a special effort to find Arizona Woodpecker, Greater Pewee, and Buff-breasted Flycatcher—the Huachucas are presently the best place in the United States to find this species. Hepatic Tanager and Grace's, Olive, Red-faced, Virginia's (uncommon), and Black-throated Gray warblers should be in full song throughout the canyons. Other possibilities include Band-tailed Pigeon, White-throated Swift, Hutton's and Plumbeous vireos, Steller's Jay, and Spotted Towhee. Some years Northern Pygmy-Owls are present in the canyon as well. An evening owling expedition into the lower canyons here will hopefully tally Whiskered Screech-Owl and Common Poorwill.

NIGHT: Hampton Inn, Sierra Vista

May 23, Day 7: To the Chiricahua Mountains. In the cool morning hours today, we will revisit the Huachuca Mountains, possibly Fort Huachuca (see Note below) or Hunter or Miller Canyon. If we decide to visit the Fort, we will head to Huachuca Canyon, home of the magnificent Elegant Trogon. Other possibilities include Spotted

Owl (best in Miller Canyon) and just arriving Sulphur-bellied Flycatcher, among others. If we opt for Hunter Canyon, the localized Black-chinned Sparrow will be possible or even the very rare Rufous-capped Warbler. Then, reluctantly, we will leave the Huachucas behind and head east to the Chiricahuas—mountain fortress of the Apaches; hideout for outlaws in the Old West; and today a national forest and Arizona's top birding area. We will start owling tonight after dinner, looking especially for the tiny and elusive Flammulated Owl (a species that has become nearly impossible to find since the fires).

NOTE: At the time of publication, the policy for entry to the fort (an active military base) requires a background check for each person in the group. Approved participants must provide government issued photo identification – typically in the form of a driver's license (Real ID Act-compliant) or passport – in order to obtain an access badge. Entry of non-US citizens into the Fort cannot be guaranteed. A military escort is required when there are non-U.S. citizens in our group. We will make every effort to arrange for such an escort, but there is always the chance one may not be available. If we are unable to visit the Fort or simply choose not to given the hassles involved, we will spend additional time in other canyons in the Huachucas. All species possible in Fort Huachuca are present in other areas, but the Fort is the best single location for Elegant Trogon.

NIGHT: Portal Peak Lodge, Portal

May 24, Day 8: Cave Creek Canyon. The Chiricahua Mountains are a magnificent range of mountains rising out of the desert to almost 10,000 feet. These Arizona Mountains as described by Roger Tory Peterson in *Wild America*:

“There they were, in the crystal morning light, rising like a massive blue island from the sea of the desert. And an island it was, in truth, part of an archipelago composed of a dozen similar ranges. They are as much a true archipelago as the Azores or Hawaii, but no surf washes their talused bases; instead the desert, dry and shimmering, besieges their foothills and sweeps across the flats to the next range, twenty, thirty, or forty miles away.”

Many birders consider the Chiricahuas the best birding area in Arizona and one of the best in the United States. Besides all the birds, this is a great place to study the concept of life zones, biological communities of plants and animals ranging from the Lower Sonoran Desert at the base of the mountains to the Hudsonian Zone at the summit. We will visit each of the major life zones in these mountains.

Today will be spent in the woodlands of Cave Creek Canyon and the lower slopes of the mountains. In this botanically unique area, plants of the Canadian forests meet those of the desert foothills to make for a fascinating mixture of habitats. Birds are abundant, including many species found in few other places in the United States. We expect to find Elegant Trogon, Sulphur-bellied Flycatcher, Whiskered Screech-Owl, Blue-throated Mountain-gem, Painted Redstart, Grace's Warbler, Hutton's Vireo, Hepatic Tanager, Rufous-crowned Sparrow, and many others.

In the juniper and oak slopes of the lower foothills, we will seek out Woodhouse's Scrub-Jay, Juniper Titmouse, and the localized and declining Black-chinned Sparrow. Mammals that we may see include White-tailed and Mule deer, Coyote, Collared Peccary (Javelina), Apache Fox Squirrel and, with luck, a White-nosed Coati.

NIGHT: Portal Peak Lodge, Portal

May 25, Day 9: Chiricahuas. Today we will visit the higher parts of the Chiricahuas, birding the ponderosa pines and oaks of the Transition Zone and the spruce and firs of the Canadian and Hudsonian zones. These high forests harbor an assortment of species typical of both the Rocky Mountain chain further north and the Sierra Madre of Mexico to the south. These include Band-tailed Pigeon; Acorn and Hairy woodpeckers; Broad-tailed Hummingbird; Cordilleran Flycatcher; Steller's Jay; Mexican Chickadee (found nowhere else in the U.S.); Pygmy Nuthatch; Western Bluebird (very localized); Hermit Thrush; Red-faced, Olive, and Virginia's warblers; Red Crossbill (sporadic); and Yellow-eyed Junco. In the evening we will take a final owling expedition. Eight species

Red-faced Warbler © Barry Zimmer

of owls are possible in different habitats of the area: Western Screech, Whiskered Screech, Elf, Flammulated, Great Horned, Barn, Northern Pygmy, and Spotted. Mexican Whip-poor-wills and Common Poorwills are also present, and chances are we will see some interesting mammals with our headlights.

NIGHT: Portal Peak Lodge, Portal

May 26, Day 10: Portal to Tucson. After an early morning trip to the flats below Portal, where Bendire's Thrasher nests and Scaled Quail, Golden Eagle, and Crissal Thrasher sometimes occur, we'll drive back to Tucson. A stop at Willcox might reveal a variety of shorebirds at the local playa/sewage pond. American Avocet, Black-necked Stilt, and Wilson's Phalarope are all possible. We will take an afternoon break before concluding our tour with a final checklist session and dinner.

NIGHT: Hampton Inn, Tucson

May 27, Day 11: Return Home. Participants may plan to depart for home at any time today.

TOUR SIZE: This tour will be limited to 14 participants.

TOUR LEADER: Barry Zimmer (a second leader will be added if tour size warrants)

Barry Zimmer has been birding since the age of eight. His main areas of expertise lie in North and Central America, but his travels have taken him throughout much of the world, including such exotic locales as Japan, Russia, Madagascar, Africa, and New Zealand. Barry is a longtime member of the New Mexico Bird Records Committee, and served on the Texas Bird Records Committee for 12 years. He has coauthored three books: *Birds of the Trans-Pecos*, *A Birder's Guide to the Rio Grande Valley*, and *Birds and Birdfinding in the El Paso Area*. Barry has a keen interest in nature photography, having captured over 1,600 species of birds on film. His other interests include sports (a diehard Red Sox fan), cooking, and movies. He received his degree in

psychology at the University of Texas in El Paso. Barry resides in El Paso with his wife, Yvonne, and their daughter, Alexandra.

FINANCIAL ARRANGEMENTS: The fee for the tour is **\$4,375** per person in double occupancy from Tucson. This includes all meals from dinner on Day 1 to breakfast on Day 11, accommodations as stated in the itinerary, ground transportation during the tour, gratuities, entrance fees including Arizona-Sonora Desert Museum on Day 1, and guide services provided by the tour leader/s. It does not include airfare from your home to Tucson and return, airport departure taxes, alcoholic beverages, special gratuities, phone calls, laundry, or items of a personal nature.

The single supplement for this tour is **\$650**.

REGISTRATION & DEPOSIT: To register for this tour, please contact the VENT office. The deposit for this tour is **\$500** per person. If you prefer to pay your deposit using a credit card, the deposit must be made with MasterCard or Visa at the time of registration. If you would like to pay your deposit by check, money order, or bank transfer, your tour space will be held for 10 days to allow time for the VENT office to receive your deposit and completed registration form. The VENT registration form (available from the VENT office or by download at <https://ventbird.com>) should be completed, signed, and returned to the VENT office.

PAYMENTS: All tour payments may be made by credit card (MasterCard or Visa), check, money order, or bank transfer (contact the VENT office for bank transfer information). These include initial deposits, second deposits, interim payments, final balances, special arrangements, etc. Full payment of the tour fee is due 150 days prior to the tour departure date (December 18, 2022).

CANCELLATION & REFUNDS:

Cancellation by Participant:

Refunds, if any, for any cancellation by a participant are made according to the following schedule: If participant cancels 180 days or more before the tour departure date, a cancellation fee of **\$250** per person will be charged unless the deposit is transferred to a new registration for another VENT tour that will operate within the next 12 months, in which case the cancellation fee will be **\$100** per person. If cancellation is made between 179 and 151 days before departure date, the deposit is not refundable, but any payments covering the balance of the tour fee will be refunded. If cancellation is made fewer than 150 days before departure date, no refund is available. This policy and fee schedule also applies to pre- and post-tour extensions. **For participants' protection, we strongly recommend the purchase of travel insurance that covers trip cancellation/interruption.**

If participant cancels:

180 days or more before departure date

179 to 151 days before departure date

150 days or less before departure date

Participant's refund will be:

Participant's deposit minus \$250*

No refund of the deposit, but any payments on the balance of the tour fee will be refunded

No refund available

*Unless the deposit is transferred to a new registration for another VENT tour that will operate within the next 12 months, in which case the cancellation fee will be \$100 per person. To qualify, cancellation must occur 180 days or more before departure date; deposit transfers must be made at the time of cancellation; and one transfer per deposit.

Cancellation by VENT:

If VENT cancels a tour prior to departure without cause or good reason, VENT will provide the participant a full refund, which will constitute full settlement to the participant.

If VENT cancels or delays a tour or any portion of a tour as a result of any Force Majeure event, VENT will use its reasonable best efforts to refund any payments on the balance of the tour fee to participant; provided that, VENT will have no obligation to provide a participant with a refund and will not be liable or responsible to a

participant, nor be deemed to have defaulted under or breached any applicable agreement, for any failure or delay in fulfilling or performing any term of such agreement. A “**Force Majeure**” event means any act beyond VENT’s control, including, without limitation, the following: (a) acts of God; (b) flood, fire, earthquake, hurricane, epidemic, pandemic or explosion; (c) war, invasion, hostilities (whether war is declared or not), terrorist threats or acts, riot or other civil unrest; (d) government order, law or actions; (e) embargoes or blockades; (f) national or regional emergency; (g) strikes, labor stoppages, labor slowdowns or other industrial disturbances; (h) shortage of adequate power or transportation facilities; and (i) any other similar events or circumstances beyond the control of VENT.

This VENT Cancellation & Refunds policy does not apply to air tickets purchased through VENT or to any special arrangements, such as additional hotel nights, that fall outside of the services described in the tour itinerary.

Victor Emanuel Nature Tours is not a participant in the California Travel Consumer Restitution Fund. California law requires certain sellers of travel to have a trust account or bond. This business has a bond issued by Travelers in the amount of \$50,000. CST #2014998-50.

TRAVEL INSURANCE: To safeguard against losses due to illness, accident, or other unforeseen circumstances, we strongly recommend the purchase of travel insurance as soon as possible after making a deposit. VENT has partnered with Redpoint Travel Protection as our preferred travel insurance provider. Through Redpoint, we recommend their **Ripcord** plan. Designed for all types of travelers, Ripcord is among the most comprehensive travel protection programs available.

Critical benefits of Ripcord include a completely integrated program with a single contact for emergency services, travel assistance, and insurance claims; **medical evacuation and rescue services** from your point of injury or illness to your **hospital of choice**; comprehensive travel insurance for **trip cancellation/interruption**, primary medical expense coverage, and much more. Optional expanded insurance coverage is available and includes items such as security evacuation coverage in case of a natural disaster or other security events, **waiver for pre-existing medical conditions exclusion**, and a “**Cancel for Any Reason**” benefit. Ripcord is available to U.S. and non-U.S. residents.*

For a price quote, or to purchase travel insurance, please visit: ripcordtravelprotection.com/ventbird; or click the **Ripcord** logo on our website (click Help and Trip Insurance); or call +1-415-481-0600. Pricing is based on age, trip cost, trip length, and level of coverage.

*To be eligible for the pre-existing medical condition exclusion waiver and the optional Cancel for Any Reason (CFAR) upgrade, you must purchase your policy within 14 days of making your tour deposit. The CFAR benefit provides reimbursement for 75% of covered costs, and increases the policy premium by approximately 50%. Policies may be purchased either for the full value of the tour fee at the time of deposit or in segments as individual tour payments are made (deposit, mid-payment, final balance, additional arrangements, etc.). The “pay as you go” approach reduces up-front expense and ensures that the amount paid toward your full policy premium is in proportion to the amount paid toward the full tour fee. If you choose to “pay as you go,” you must cover each deposit or payment within 14 days in order to maintain the CFAR benefit. The primary medical expense benefit is available to U.S. residents only. For this reason, non-U.S. residents will pay an adjusted premium when purchasing a comprehensive policy, which includes all of the other benefits available to U.S. residents. Please refer to the policy for a full description of coverage.

Coronavirus (COVID-19):

The coronavirus pandemic has brought uncertainty for many people currently holding travel insurance policies or who are considering future travel and purchasing such insurance. Redpoint has added a **Coronavirus FAQ page** to its website that addresses questions and concerns regarding its travel insurance and the impact of COVID-19. We strongly recommend that you visit the page for an overview of topics such as policy coverage and limitations, policy modifications, cancellation, refunds, and more. Among the most important points: 1) Trip cancellation solely for concern or fear of travel associated with COVID-19 is not covered; 2) Should you request cancellation

of your policy, a full refund of your premium is available only under a limited set of conditions; and 3) Should you request cancellation, you may be eligible to receive a pro-rated refund of the unused portion of your premium or a travel insurance credit. Travel insurance credit ("Premium Credit") is for the value of the policy purchased and may be applied to future policies. Premium Credits have no expiration dates. Rules and regulations apply.

Please visit the **Coronavirus FAQ** page at the following link:

https://redpointtravelprotection.com/covid_19_faq/

Additionally, as countries begin opening up for travel, many are instituting an array of COVID-19 entry requirements, including mandates to purchase travel insurance covering medical expenses due to COVID-19 Illness and accommodation in case of quarantine. Ripcord's comprehensive travel insurance plans are designed to satisfy the various country-specific travel insurance entry requirements. Those who purchase a Ripcord policy will receive a "letter of confirmation" that affirms that the policy satisfies such requirements.

FUEL & FUEL SURCHARGES: In the uncertain, often volatile oil market of late, it is difficult if not impossible to predict fuel costs over the long term, and more specifically, at the time of operation of this departure. Our prices are based upon the prevailing fuel rates at the time of itinerary publication. While we will do everything possible to maintain our prices, if the fuel rates increase significantly, it may be necessary to institute a fuel surcharge.

AIR INFORMATION: Victor Emanuel Travel is a full-service travel agency and wholly owned subsidiary of Victor Emanuel Nature Tours (VENT). Victor Emanuel Travel will be happy to make any domestic or international air travel arrangements from your home and return. Please feel free to call the VENT office to confirm your air arrangements.

BAGGAGE: We request participants limit their luggage to one medium-sized bag and one carry-on, if possible, as space in the vehicles will be limited.

CLIMATE/CLOTHING: The temperate climate of Arizona's mountains promises warm days and pleasant nights. Daytime highs around Tucson may reach the upper 90s, possibly higher; in the mountains, temperatures will be considerably cooler, with highs in the low to mid 80s. Nighttime lows in some upper elevation areas may dip down into the 40s. Lightweight clothing, hat, and sunscreen are recommended for midday, but long-sleeved shirts and sweaters are appropriate for mountain evenings. Also, there may be a few opportunities for swimming, so bring along a bathing suit. Comfortable walking shoes or boots are a must; and you should be prepared for showers with a raincoat or poncho. Hiking boots would be appropriate for the steep climbs in California Gulch and Miller Canyon. Informal dress is the rule throughout the tour. **Please bring dark clothing for owling expeditions:** bright colors (particularly whites, yellows, etc.) may scare away our nocturnal targets.

CONDITIONS: Virtually all of our hikes will be two miles or less. Some will be over relatively flat ground while others (California Gulch & Miller Canyon) will be in steep canyons. We will have early starts most mornings (sunrise is around 5:20 a.m.) to take advantage of cool morning hours. Breakfast may be as early as 5:00 a.m. some mornings, but will usually be around 6:00 a.m. Several nights (often five nights) of owling will be offered. Elevations on this tour route range from about 2,600 to 8,400 feet.

EQUIPMENT: You should pack a pair of binoculars that are in good condition, along with a belt pack or day pack (for carrying books, sunscreen, camera, etc.). As a precaution, it is a good idea to pack your binoculars, a change of clothing, toiletry items, medication and travel documents in your airline carry-on bag. Your leader will have a spotting scope, but if you have one and wish to bring it, please feel free to do so.

We recommend a water bottle for carrying water into the field. You will also need a flashlight or headlamp. Lip balm is useful in this dry climate to protect against chapped lips. **Every person should bring an alarm clock as there is no wake-up service at one of the lodges where we will be staying.**

INTERNET & PHONE ACCESS: High speed internet or Wi-Fi is available at each hotel on this tour. Cell phone service and internet are generally available throughout the tour; however, most cell providers do not have service in the Portal area. At this time, only Verizon customers have service at this location. **At Portal, cell phones from Verizon may pick up a signal from a cell tower in New Mexico. Since New Mexico is on a different time than Arizona, your phone may display the incorrect time at that location.**

HEALTH: VENT follows Centers for Disease Control and Prevention (CDC) recommendations for standard travel precautions, which includes vaccination against a variety of preventable diseases. Among these so-called Routine Vaccinations are measles/mumps/rubella (MMR) vaccine, diphtheria/pertussis/tetanus (DPT) vaccine, poliovirus vaccine (boosters for adult travelers), and Varicella (Chickenpox). You should also be up-to-date with Hepatitis A and Hepatitis B vaccinations.

If you are taking personal medication, prescription or over-the-counter, be sure to bring an ample supply that will allow you to get through the tour safely. Please consult your physician as necessary. Remember to pack all medication in your carry-on baggage, preferably in original containers or packaging. As airline baggage restrictions can change without warning, please check with your airline for procedures for packing medication.

COVID-19: We continually emphasize that our number one priority is the health and safety of our customers and employees. **With this in mind, VENT maintains a COVID-19 vaccination requirement.** All tour participants and tour leaders must receive the primary series vaccinations in order to travel with us while we are still in a declared public health emergency. Proof of vaccination must be provided to our office at least one week before the start of the tour. More recently, the Centers for Disease Control and Prevention (CDC) has updated its guidance to recommend people be Up to Date with COVID-19 vaccinations. Although the CDC website defines “Up to Date” as the primary series vaccinations and all recommended boosters, for those eligible, VENT requires the primary series and strongly recommends boosters. While VENT no longer requires a booster shot for participation on its tours, the high transmissibility of certain variants and subvariants should encourage everyone who is eligible to receive boosters to please do so. VENT has determined this approach to be the best one for keeping our tour leaders and tour participants safe during this time. Our decision and policy anchor a regime of protocols firmly rooted in the latest CDC guidance regarding recommendations for avoiding COVID-19. Please visit the **Coronavirus Travel Update** page of our website <https://ventbird.com/covid-19>, where you may view our **COVID-19 Protocols for VENT Tours** document, which details the guidance VENT will follow in the operation of its tours in the time of pandemic. Please visit the CDC website for the most up to date information about COVID-19 and associated guidance for proper health and hygiene: <https://www.cdc.gov/coronavirus/2019-nCoV/index.html>.

Insect Repellents – There are insect repellents for the skin and an insect repellent used to treat clothing that should not be applied to the skin.

Insect repellents for the skin are commonly available in three forms:

- DEET (N,N-diethyl-meta-toluamide): A chemical compound that is marketed under various brand names (OFF!®, Cutter™, Ultrathon™, etc.) and offered in a variety of formulations including sprays, lotions, time-release preparations, and disposable wipes. The formulations will state a percentage of the active ingredient DEET on the packaging. DEET may be applied to exposed skin directly and/or sprayed on clothing. Please be careful when applying DEET as it can damage plastics and lens coatings.
- Picaridin: A synthetic formulation that is derived from piperine, a substance found in plants that produce black pepper.
- Herbal insect repellents: Various mixtures of organic ingredients such as oils from eucalyptus, citronella, cedar, and other herbs. The herbal repellents are more difficult to categorize because of the difference in ingredients from one brand to another. There is considerable variation in their effectiveness.

An insect repellent for clothing is marketed in one approved formulation:

- Permanone® (Permethrin) is an odorless spray-on repellent that may be used for **pre-treatment** of clothing, gear, and tents. It should not be used directly on the skin or sprayed on clothing while it is being worn. The pre-treatment process requires a number of hours to complete and must be done outdoors, so is best completed in advance of travel. Do-it-yourself pre-treatment has to be repeated more often than commercial treatment using Insect Shield® technology. It is available at various outdoor stores and can easily be found online.
- Insect Shield® apparel: Clothing pre-treated with Permanone is made by a variety of manufacturers. It is available for purchase from some sporting goods suppliers. The clothing is advertised as retaining its repellency for up to 70 washings.

The US EPA offers a search tool to help choose a repellent that is best for a particular situation. For example, some repellents work for mosquitoes, but not for ticks.

<https://www.epa.gov/insect-repellents/which-insect-repellent-right-you>

In addition to your physician, a good source of general health information for travelers is the U.S. Centers for Disease Control and Prevention (CDC) in Atlanta, which operates a 24-hour recorded Travelers' Information Line (800) CDC-INFO (800-232-4636). You can check the CDC website at <https://wwwnc.cdc.gov/travel>. Canadian citizens should check the website of the Public Health Agency of Canada: <https://www.canada.ca/en/public-health.html> (click on Travel Health).

A Note About Chiggers: This tour visits areas where chiggers are known to occur. Chiggers are tiny parasitic mites found in most warm weather areas of the southern United States and the world's tropics. They are especially numerous in grassy areas, where, in the immature stage, they attach themselves to other animals or humans who make contact with the grass as they pass by. Chiggers do not suck blood and the majority of species do not carry disease. They do feed on bodily fluids through a process in which a digestive enzyme is produced by the chigger which essentially liquefies the skin around the area where the chigger is attached. The chigger is not usually attached to the skin for more than a few hours before it either falls off or is knocked off. Our bodies respond by producing a hardened area as a defense against the chigger's digestive enzyme. Though the chigger may be long gone, it is the presence of the hardened area, and the body's natural process of reabsorbing it that typically causes intense itching, often lasting for a week or more. Chiggers like to attach themselves to areas of thin skin, like around the ankles, beltline, undergarment lines, knees, and elbows.

Chiggers can be avoided by following these procedures:

- Avoid walking or standing in areas dominated by grass. These areas are where one is most likely to encounter chiggers.
- Tuck your pants into your socks to avoid direct skin-to-grass contact. Chiggers can find their way through clothing, but this is a standard and effective prevention technique.
- Apply insect repellent to your skin and clothing. Please refer to the Insect Repellent section that follows for important information about selecting and applying repellent.
- Powdered sulfur applied to waist, bottoms of pants, sock and boots is also effective at repelling chiggers. However, be warned that clothes will retain the sulfur odor for several washings. If using sulfur, never touch your eyes, nose, or mouth before washing your hands first.
- Shower at the end of each day in the field. Use a washcloth to vigorously rub your legs, feet, and ankles.

By following these methods, you should be able to avoid all chigger bites, as well as tick bites. If, however, you are bitten by chiggers anyway, you can reduce or eliminate the symptoms by applying benzocaine or hydrocortisone creams, calamine lotion, After Bite, or any number of anti-itch products.

SUGGESTED READING: A number of traditional booksellers and online stores list excellent inventories of field guides and other natural history resources that will help prepare you for this tour. We recommend www.amazon.com which has a wide selection; www.buteobooks.com and www.nhbs.com which specialize in ornithology and natural history books; and www.abebooks.com for out-of-print and hard-to-find titles.

TIPPING: Tipping (restaurant staff, porters, drivers, local guides) is included on VENT tours. However, if you feel one or both of your VENT leaders or any local guides have given you exceptional service, it is entirely appropriate to tip. We emphasize that tips are not expected and are entirely optional. Tips should be given directly to your tour leader; they should not be sent to the VENT office.

RESPONSIBILITY STATEMENT: Victor Emanuel Nature Tours, Inc., a Texas corporation, and/or its agents (together, "VENT") act only as agents for the participant in regard to travel, whether by railroad, motorcar, motorcoach, boat, or airplane and assume no liability for injury, damage, loss, accident, delay, or irregularity which may be occasioned either by reason of defect in any vehicle or for any reason whatsoever, or through the acts or default of any company or person engaged in conveying the participant or in carrying out the arrangements of the tour. VENT accepts no responsibility for losses or additional expenses due to delay or changes in airfare or

other services, sickness, weather, strike, war, quarantine, terrorism, or other causes. All such losses or expenses will be borne by the participant, as tour rates only provide for arrangements for the time stated.

VENT reserves the right (i) to substitute hotels of similar category, or the best reasonable substitution available under the circumstances, for those indicated and (ii) to make any changes in the itinerary that are deemed necessary by VENT or which are caused by third party transportation schedules (i.e., railroad, motorcar, motorcoach, boat, airplane, etc.).

VENT reserves the right to substitute leaders or guides on any tour. Where VENT, in its sole discretion, determines such substitution is necessary, it will notify tour participants.

VENT reserves the right to cancel any tour prior to departure with or without cause or good reason. See the VENT Cancellation & Refunds policy set forth above.

Tour prices are based on tariffs and exchange rates in effect on August 12, 2022, and are subject to adjustment in the event of any change thereto.

VENT reserves the right to decline any participant's Registration Form and/or refuse to allow any participant to participate in a tour as VENT deems reasonably necessary, in its sole discretion. VENT also reserves the right to remove any tour participant from any portion of a tour as VENT deems necessary, in its sole discretion, reasons for such removal include but are not limited to, medical needs, injury, illness, inability to meet physical demands of a tour, personality conflict or situations in which such removal is otherwise in the best interest of the tour, the tour group and/or such participant. A participant may also voluntarily depart from a tour. If a participant is removed from a tour or voluntarily departs from a tour, such participant will be responsible for any expenses associated with such removal or departure, including but not limited to, transportation, lodging, airfare and meals, and VENT will have no obligation to refund or reimburse any such removed or departed participant for any tour payments or deposits previously paid by such participant.

Baggage is carried at the participant's risk entirely. No airline company, its employees, agents and/or affiliates (the "**Airline**") is to be held responsible for any act, omission, or event during the time participants are not on board the Airline's aircraft. The participant ticket in use by any Airline, when issued, will constitute the sole contract between the Airline and the purchaser of the tickets and/or the participant. The services of any I.A.T.A.N. carrier may be used for VENT tours, and transportation within the United States may be provided by any member carrier of the Airlines Reporting Corporation.
